Career Objective

Entry-level Software and Web Developer with hands-on experience in React JS, WordPress, and AI-integrated web solutions. Skilled in building responsive applications and machine learning projects, with a strong focus on user experience and problem-solving.

Core Competencies

- Languages: C, Python, SQL
- Web Technologies: HTML, CSS, JavaScript, React JS.
- Tools: GitHub, VS Code, WordPress, Docker, CLI, Power BI.

Key Strengths:

- Project planning
- Team Collaboration
- Time Management & Organization
- Adaptability & Quick Learning

Areas of Interest

- Artificial Intelligence.
- Software Development.
- Web Development.

Co-Curricular

- SIH 2022 & 24 — Participant
- SIH 2025 — Internal Round
- SDG Hackathon 2026 — Finalist
- Niral Thiruvizha 3.0 — Top 500
- SIF Pitch Fest 2026: Winner

Certificates

- Cloud & Virtualization — IT Academy
- UiPath RPA Citizen Developer Foundation
- Full-Stack Web Development Bootcamp By Udemy | 2025
- Power BI Workshop — OfficeMaster | 2025

Languages Known

- Tamil-R, W, S
- English- R,W, S
- Urdu- R, W, S
- Hindi- S

Education

SONA COLLEGE OF TECHNOLOGY (PG)

Master of Computer Applications / 8.6 CGPA

Currently pursuing

SONA COLLEGE OF ARTS & SCIENCE (UG)

Bachelor of Computer Applications / 7.9 CGPA

Graduated May 2025

ST.JOHN'S MATRIC HR SEC SCHOOL

Higher Secondary Certificate (HSC) / 58%

Completed May 2022

Secondary School Leaving Certificate (SSLC) / 62%

Completed May 2020

Internship

Sasha Infinity — Web Developer

Duration: Jun 2025 - Present

- Developed and maintained Tutor LMS platform with interactive course modules.
- Customized and managed WordPress websites including plugins and updates.
- Assisted in integrating AI-driven tools to enhance user interaction.

Project

Title: Control Mouse with Hand Gesture Detection

Tools: Python, OpenCV, MediaPipe

Description: Developed a computer vision system to control mouse actions through real-time hand gesture recognition, enabling touchless human-computer interaction.

Title: Credit Card Fraud Detection Using ML

Tools: Python, Scikit-learn, Pandas, NumPy

Description: Built a machine learning classification model to detect fraudulent transactions by analyzing financial behavior patterns.

Title: Department Conference Website Development

Tools: HTML, CSS, JavaScript, Figma.

Description: Designed and developed a static web page for an international conference organized by the department.
